

A Venn diagram illustrating the relationship between three sets of probability distributions. It consists of three nested rectangles with rounded corners. The innermost rectangle is dark red and contains the text "Product Distributions". The middle rectangle is a lighter shade of red and contains the text "Computable Probability Distributions". The outermost rectangle is the lightest shade of red and contains the text "All Probability Distributions". The rectangles are nested such that the innermost is completely inside the middle one, and the middle one is completely inside the outermost one, indicating that the set of Product Distributions is a subset of Computable Probability Distributions, which is a subset of All Probability Distributions.

Product Distributions

Computable Probability Distributions

All Probability Distributions
